

LUCAS EQUINE EQUIPMENT, Inc.
seamless. flawless. timeless.

Euro Styling

Traditional European styling can give your barn the look you desire. **Lucas Equine Equipment** designs Euro stalls for ultimate style and strength. Our expert design engineers can help you balance Old World styling, equine safety, and pricing... without sacrificing quality. Lucas Equine Equipment Euro-style stalls are **custom designed and custom built for you.**

High-front designs. This stylish option offers extra security and peace of mind.

Swooping-front designs. Match your barn's architectural aesthetic and offer your animals more socialization.

Heavy gauge structural steel. Our all-steel components are built using heavy gauge materials for optimal strength and durability.

Solid contact points. At every attachment site, our mounting brackets, hinges and other hardware are designed to connect solidly with your door, stall front or posts. This design feature provides exceptional stall durability and animal safety.

Attention to detail. Surface joints on every Lucas Equine Equipment project are welded thoroughly and ground smooth prior to painting for a beautiful seamless finish.

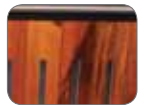

Aesthetic detail. Our professional architect designs your Euro stalls to have beautiful, clean lines, and conceal mounting plates and hardware whenever possible.

Safer steel tubing placement. Three-quarter to one-inch steel tubing with a maximum three-inch on-center spacing provides excellent safety for your animals. At Lucas Equine Equipment, we won't compromise on quality or safety.

Highest quality raw materials.

We're perfectionists, especially when it comes to the materials we use. We select only the highest quality steel and wood, and inspect them in detail before we even begin your project.

Impeccable finishes. Getting an excellent finish is definitely an art. Our team of coatings specialists work meticulously to create a smooth, consistent finish on every part of every project.

Precision design. Precision construction.

Exact measurements, well thought-out designs, detailed drawings and an exacting eye help ensure Lucas Equine Equipment stalls are easy to install and fit right in with your barn's design.

Quality control. With our stringent quality control process, your order is inspected at each point in the production process, from the design drawings to the time it leaves our shop.

The most choices on the market. While many companies may say they offer custom designs, Lucas Equine Equipment can truly offer you any style, option or design you wish. For instance, we have more than 20 types of latches and 190 color choices, plus custom color matching.

Why Choose Lucas Equine Equipment

To help ensure that we develop a product that best meets your needs and style, Lucas Equine Equipment offers pre-construction consultations and free quotes. Consultations between our design experts and you or your builder include:

- Recommendation on stall or barn layout
- Discussions with a builder or architect
- Suggestions on finishes, materials and hardware
- Farm tours
- Referrals
- Optional site visit
- Construction drawings and product specifications

Our on-staff experts and in-house machine capabilities allow us to provide our customers with superior stall equipment. Lucas Equine Equipment capabilities include:

- On-staff coatings specialists
- In-house architect
- Full 3-D rendering capabilities
- Custom designs
- Shipping and logistics experts
- Optional on-site installation supervision

We pride ourselves in providing excellent service throughout the entire design, build and installation process. With Lucas Equine Equipment, you'll be dealing with the experts who can recommend design solutions and materials that meet your individual needs. Plus, our **one-year warranty** against defects in Lucas Equine Equipment workmanship and materials gives you peace of mind on your investment in quality stall equipment.
